

February 10, 2009

Dear _____

I am pleased to provide you with the latest version of Feedlot Solutions. In this version we've introduced a new weight method: California Net Energy System, added shortcuts and past feed information on the feed screen, introduced seven day feed efficiency to the yard snapshot, dual operational screens direct from the purchase/sales screens, ability to do several pen transfers without re-opening request, and now allow the client to make changes to easily do corrections, along with a new backup system, a charge button on the accounts receivable screen, and new export functions.

The new features with some detail are as follows:

1. Advanced Estimated Gain Equations.
2. Feed Screen
3. Yard Snapshot
4. Purchase & Sales Screens
5. Pen Transfers
6. Easy Corrections
7. New Backup Features
8. Accounts Receivable Screen
9. Export functions

Please call **1-888-520-7333** or email jessica.grimes@feedlotsolutions.com for an appointment to help you with the installation and explanation of new features. (If using Feed Bunk-that program needs to be updated to the 2009 version)

Enclosed are the upgrade installation instructions and details on new features for your Feedlot Solutions manual.

Respectively

2009 Upgrade Installations Instructions

Please read and follow the following instructions:

1. Upgrade early in the day and the work week to ensure that we will be able to help you in a timely manner.
2. Make sure all feed is entered to current date.
3. If you have Feed Bunk Solutions
 - a. Back up FBS
 - b. Export from FBS to FLS. (This is very important)

Upgrading Feedlot Solutions

1. Backup your Feedlot Solution Data
2. Make sure Feed is entered up to date if using the new gain factor of California Net Energy
3. Run Database maintenance wizard in FLS
4. Run Yard Snapshot report (under Analysis-yard snapshot)
5. **Create backup** then close Feedlot Solutions
6. Download installation file and save this onto desktop (Must be on internet explorer V.7 or higher)
 - a. ftp://ftpuser@viewtrak.com/fls/fls_us_pro_2009_setup.exe
7. Contact either Jessica.Grime@feedlotsolutions.com or Galen.Loseke@feedlotsolutions.com for Username and Password.
8. Run installation file off desktop (double click-choose run), follow through the steps on wizard
9. Open FLS, you will see "Please Register box" with a serial number, please email that exact serial number (any dashes included), along with Yard name to jessica.grimes@feedlotsolutions.com I will then create the owner's file and email it back to you. This file gets saved into your FLS folder.
10. **Create a backup** then run Database maintenance wizard in FLS
11. If using the California Net Energy system for new weight method be sure weights are updated, enter the NEM (net energy maintenance, Mcal/cwt.)/NEG (net energy gain, Mcal/cwt.), and update all lots to this weight method.
12. If you have Feed Bunk Solutions go to next step, if you don't, you are done.

Feed Bunk Solution

1. Backup your Feed Bunk Solutions if you have not already done so.
2. Download installation file and save this onto desktop (Must be on internet explorer V.7 or higher)
ftp://ftpuser@viewtrak.com/fls/fbs_pro_2009_setup.exe
3. Contact either Jessica.Grime@feedlotsolutions.com or Galen.Loseke@feedlotsolutions.com for Username and Password.
4. Run installation file off desktop (double click-choose run), follow through the steps on wizard
5. Open Feed Bunk program and email Jessica.Grimes@feedlotsolutions.com your **serial number (including any dashes, company name and program version)** to receive a new owner's file. This will get saved into the FBS folder.

After you complete the Feed Bunk Installation

1. Export from Feedlot Solutions to Feed Bunk Solutions.

Please call for help if you don't understand how to do something.
